SUMMARY

Self-taught Software Engineer with a strong foundation in full-stack web and cross-platform mobile development. Proven ability to build and deploy scalable applications (React, Node.js, Flutter) alongside pursuing a formal computer science degree. Passionate about delivering efficient code and solving complex problems with the right scope.

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, JavaScript (ES6+), React
- Backend: Node.js, Express.js, RESTful APIs, Database Management
- Mobile: Flutter, Dart
- Tools & Methodologies: Git/GitHub, Discord.js, Responsive Web Design, UI/UX implementation

EXPERIENCE

Freelance Software Developer

Lebanon | [6, 2020] – Present

- Designed, developed, and deployed masjidhussien.org, a fully responsive platform for a local community organization.
- Collaborated directly with the client to define project scope, translating community needs into technical requirements.
- Optimized web assets and implemented semantic HTML/CSS, resulting in improved search engine visibility and accessibility across all device sizes.

PROJECTS

Motovery | Flutter, Dart, Firebase

- Engineered a cross-platform mobile application to streamline delivery logistics and user coordination.
- Designed an intuitive user interface for seamless navigation, optimizing the user experience for both delivery personnel and customers.

Brotoli | React, Node.js, Discord.js, MariaDB

- Advanced Discord Bot That Can be used anywhere
- Architected a RESTful API backend using Node.js and Express to handle user authentication, data storage and retrieval.
- Implemented a responsive dashboard in React, utilizing state management to ensure a smooth, dynamic user experience.

ProMart | React.JS, Firebase/MariaDB (both versions)

- Built an e-commerce digital storefront featuring dynamic product rendering and shopping cart functionality.
- Ensured secure and efficient data flow between the frontend interface and backend product database.

Discord.JS Bot Template | JavaScript, Node.js, Discord.js

- Authored an open-source Discord bot template to simplify the initial setup and deployment process for community managers.
- Structured the codebase with modular command handling, allowing external developers to easily scale and customize the bot's functionality.

EDUCATION

Self-Taught, Next Steps: AUB or LU

Lebanon

Bachelor's degree in computer science & engineering | Expected Graduation: [8, 2030]
